World Ocean Council

International, Cross-Sectoral Business Leadership Alliance

A healthy and productive global ocean and its sustainable use, development and stewardship by a responsible ocean business community

- Bringing ocean industries together
- Catalyzing leadership and collaboration in addressing ocean sustainability

World Ocean Council

Creating business value for responsible companies

Access and social license for responsible ocean use

Synergies and economies of scale addressing issues

Stability and predictability in ocean operations

Ocean Business Community

Direct Ocean Users

Ocean User Support Industries

Ocean Use Infrastructure Providers

WOC Programs & Strategies

- Coordinate proactive industry input key ocean policy processes
- Develop informed, coordinated, proactive industry input to marine spatial planning
- Catalyze collaboration on science-based solutions to shared issues
- Create cross-sectoral ocean industry councils in key regions
- Improve ocean understanding through industry involvement in ocean science, observations, data sharing

WOC Smart Oceans / Smart Industries Program Goals

Expand

- Number of vessels and platform collecting
- Standardized ocean, weather and climate data

Coordination

- Improve data sharing
- Make input more efficient to national/intnl systems

Opportunity

- Build on “ships of opportunity”

Smart Oceans/Smart Industries

Platforms

Information

Status/Trends

Understanding

Platforms
(Opportunity)

Platforms

How can we make use of the variety of industry vessels and platforms at sea?

Fisheries

Aquaculture

Platforms

Ferries

Offshore wind energy

Wave/tidal energy

Opportunities of Ships

**Number of ships -
by total and trade**

Bulk Carriers: 8,687

Container ships: 4,831

Tankers: 13,175

Passenger ships: 6,597

TOTAL: 50,054

Figures in brackets are numbers of ships, by sector.
Source: IHS Fairplay October 2010

Opportunities of Platforms

Platforms

Number of oil/gas wells and rigs:

- Wells drilled in Gulf of Mexico: ~ 40,000
- Deepwater wells drilled internationally: ~ 14000
- Number of rigs internationally: ~ 8,000
- US rigs/platforms: ~ 3,500; including 79 deepwater wells

Information
(Data)

Information

How do we provide routine, sustained, standardized information on the ocean and atmosphere?

Status and Trends

What is the best way to contribute to describing the status, trends and associated variability?

Understand
(Knowledge)

Understand

Can we improve the understanding, modeling and forecasting of ocean ecosystems and related resources, weather, climate and climate change?

Smart Oceans/Smart Industries

Comprehensive

Scaleable

Entry Options

Cost-Efficient

Smart Oceans/Smart Industries

Comprehensive

Incorporates
needs and
opportunities

From a variety
of industries

Address ocean,
weather and
climate data

Smart Oceans/Smart Industries

Within
industries

Scaleable

Across
industries

Upgradeable
over time

Smart Oceans/Smart Industries

Retrofit

Existing
vessels and
platforms

Entry
Options

New build

Smart Oceans/Smart Industries

Synergies

Within and
between
industries

Economies
of scale

Cost-Efficient

NEXT STEPS for WOC

PEOPLE

**Connecting people....who may have
different interests and value
propositions to a SO/SI program**

Smart Ocean/Smart Industries

- Develop joint Industry/Science Steering Committee
- Define value proposition, rationale and feasibility for both industry and science community
- Inventory of existing ships/platforms of opportunity programs

Smart Ocean/Smart Industries

- Define the “menu of options” for voluntary observations
- Define interface requirements for platforms / payload
- Explore and explain the principles and practice of open data access and the telemetry issues
- Develop Advisory Group for input from broader range of industry / science representatives

Smart Fishing Vessels Workshop

- Assemble fisheries industry data gathering experience.
- Develop common understanding of opportunities and constraints for fishing vessel data collection.
- Facilitate fishing industry learning from/collaborating with other ocean industries in data collection.
- Develop shared information on the technology and instrumentation available for use on fishing vessels.
- Identify priorities and quality assurance for fishing industry data collection.

Thank You!
